# CANDLE RANGE THEORY

- Each candle is the range. Every candle has its own po3.
- With respect to HTF PD arrays Look for 4hr candle forming at specific time of the day.
- ( **1am-5am-9am EST** ) 🗝️
- Wait for candle to purge the high/low of the 1st candle and then close inside the 1st candle range at the specific time (1-5-9) and look for entries in LTF ( TSQ)
- 1hr time frame -High probability TS at 1am - 3am  
- 6am- 9am EST.

- 1. Before looking the CRT formation one should confirm the higher time frame bias.**
- 2. Below CRT low or above the CRT high there should be a ORDER BLOCK OR MITIGATION BLOCK OR BREAKER BLOCK OR FAIR VALUE GAP OR SSL/BSL.**
- 3. HIGHER TIME FRAME PREMIUM / DISCOUNT AREA SHOULD BE CONSIDERED. SELL AT THE PREMIUM BUY AT THE DISCOUNT.**

# TIME & PRICE

Key timing for TS the CRT high or low

## FOREX

4hr timeframe - 1am, 5am & 9am EST

1hr timeframe - 3am, 6am & 9am EST

## INDEX FUTURES

4HR TF- 2am, 6am & 10am EST

**PATTERN ALONE NEVER WORKS ALWAYS.**

**WITH HTF BIAS/ KEY LEVELS + TIME+ LOOK FOR PATTERNS**

# TIME FRAME ALIGNMENTS

HTF (CRT)

LTF(TSQ)

**WEEKLY**

## **Points to remember**

- **Pattern alone never works always.**
- **Only sell at premium & Buy at the discount.**
- **Look for TS at the specific key time**
- **Trading CRT along with HTF bias has better win rate.**
- **More the inside bars higher the probability.**
- **Book partials and Move Break even at the 50% of the range.**
